# CYBER RANGES is the elite simulation sandbox for exercising your cybersecurity personnel.

CYBER RANGES provides a hyper-realistic simulation of real-world networks and attacks. As a result, the solution is the most effective platform in the world for preparing blue and red teams to excel in their roles.

## Fit for Military

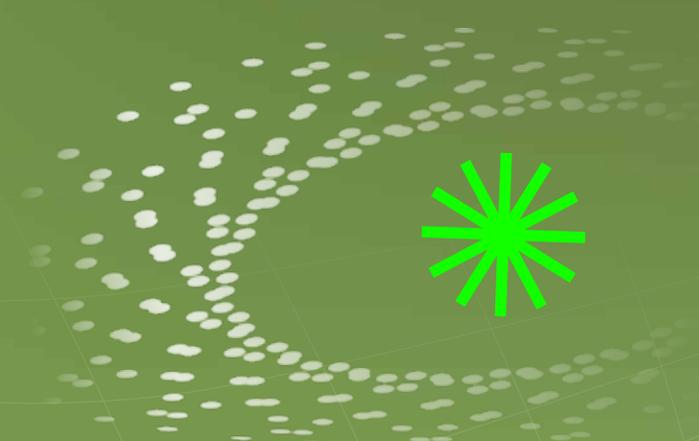

**CYBER RANGES has been conceived for deployment in military training environments.** You will find current and upcoming needs for every cyber defence function on CYBER RANGES, available also PORTABLE.

## Comprehensive

**CYBER RANGES covers the entire spectrum of training, assessment and exercise needs in the cyberspace domain**, from basic awareness courses to complex scenarios in high-fidelity environment replicas. We are the ultimate complete solution that covers the most up-to-date cyber defence requirements. We empower your team with the most disruptive cyber exercise technology.

## Flexibility

CYBER RANGES offers clients a transversal set of products and services that satisfy their needs without any kind of constraints. In addition, **the flexible deployment options provide you with solutions that completely adapt to specific infrastructure and confidentiality requirements.**

Prepare your front line

## Your next cyber attack is not a matter of if, but when. Proper cybersecurity training is no longer optional.

The increasing reliance on digitization in military equipment, command, and operation platforms increases the surface of cyber exposure to threat actors and cyber attacks.

CYBER RANGES is a cutting-edge scalable turnkey training, testing, and evaluation platform that can be used to support a wide range of easily repeatable yet large-scale complex simulation activities and help develop mission-critical operational expertise.

**Let's Talk** >

CYBER RANGES specialists are available 24/7 to assist you against:

**Increase in cyber attacks**

**Irrelevant attack training scenarios**

**Lack of experienced cybersecurity pros**

**Attack response plans in need for resilience testing**
